Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the original planar figure object showing a 3-D appearance by the reflection of lights entering into the curved surface at different angles, does not reasonably provide enablement for the original planar figure object showing a 3-D appearance by the reflection of lights entering into any surface at different angles. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is insufficient antecedent basis for the limitation of the original planar figure in the claim. It is unclear if the "original planar figure" is referred to the figure or the planar surface previously recited. It is also unclear if, after the figure object

is printed on the curved surface, the curved surface become planar. The following examination will be base on the assumption that the curved surface become planar after the figure object was printed on, as implied by the limitation "original planar figure".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Greemblat et al (US 6,042,904).

Greemblat discloses an achievement trophy comprising a base and a main body embedded into the base and have a predetermined thickness (see FIG. 1). The main body has one side in a planar form and other side with a sports figure on the surface showing a three-dimensional appearance (see FIGs 5-6).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1775

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Greemblat as applied to claim 1 above, and further in view of the same reference.

As stated above, Greemblat discloses a trophy has the same structure as recited in claim 1.

Greemblat does not specify that the figure to be a soccer player, however, Greemblat teaches that the figure can be a golfer, a bowler, a basketball player and other types of athletic figures. Since soccer is one of the most popular sports in the sports world, it would have been obvious to one of ordinary skill in the art to make the trophy taught by Greemblat with soccer player as the athletic figure printed on the trophy in order to use it in a soccer game for awarding the winners.
